
PDF Viewer User Guide

Overview & Quick Start

Welcome to PDF Viewer. This application is designed with a warm, minimalist aesthetic featuring a pale beige background (#FAF7F2) and rosy brown accent buttons (#BC8F8F).

Key Capabilities

1. Automatic Table of Contents generation.
2. Instant page jump and slider scrubbing.
3. Bookmarks with custom notes.
4. Complete offline viewing mode backed by local IndexedDB caching.

Chapter 1: System Overview

1.1 Architecture & Design

The viewer is crafted for readability, fast responsiveness, and complete offline capability. All PDF processing takes place in your browser, guaranteeing total privacy.

1.2 Elegant Aesthetics

The soothing pale beige background minimizes eye strain during extended reading sessions, complemented by refined Rosy Brown controls.

Chapter 2: Automatic Table of Contents

2.1 Outline Extraction

When a PDF contains embedded outline trees, the viewer extracts each node and maps it directly to destination page indices.

2.2 Smart Fallback Generation

For PDFs lacking embedded outlines (e.g. scanned documents or ' (simple exports), the heuristic engine analyzes headings, and patterns such as Chapter, Section, or Japanese markers.

Chapter 3: Page Navigation & Thumbnails

3.1 Direct Jump

Type any target page number into the control box or scrub the smooth navigation slider to traverse large documents in milliseconds.

3.2 Page Thumbnails Rail

Toggle the thumbnail tab to see live visual previews of all pages in the document, allowing rapid visual scanning.

Chapter 4: Bookmarks & Annotations

4.1 Adding a Bookmark

Click the Bookmark ribbon button in the toolbar or press the shortcut to save the current page.

4.2 Managing Your Bookmarks

Every bookmark can hold custom notes, editable titles, and timestamps, neatly organized in the bookmarks sidebar tab.

Chapter 5: Offline Viewing Mode

5.1 Zero-Network Reading

Save any document to local IndexedDB with a single click. When traveling or in disconnected environments, open your library instantly.

5.2 Storage Quota Management

Inspect exact storage usage in megabytes, manage cached documents, and enjoy seamless PWA service worker caching.

Chapter 6: Tips & Shortcuts

6.1 Keyboard Navigation

Use Left/Right arrow keys or PageUp/PageDown to flip pages. Press Ctrl/Cmd+F to activate document search.

6.2 Fullscreen & Zoom

Fit to Width, Fit to Page, or use pinch-to-zoom to read comfortably on mobile, tablet, or desktop.

Conclusion & Summary

Thank you for using PDF Viewer

We hope this application provides a calm, productive, and reliable reading experience whether online or offline.
